Posting Title: Translational Mouse Model Core Facility

Posting Text: The Core will provide humanized mouse models to the researchers around the nation, in the form of collaborations. For any pilot projects or for grant applications involving humanized mice, contact us for free consultations to discuss and develop the experimental plan. We will also help with the budget and preparing the subcontract for grant application.

Looking for Service

Type: Bioethics Consultation Support
Clinical Assessment (Hematology, Clinical Chemistries, etc.)
Computational - Biostatistics
Genotyping
Library Services
Mass Spectrometry
Monoclonal Antibody
oligo synthesis
Peptide Synthesis
Proteomics
Sequencing - DNA Sequencing
Sequencing - Next Generation Sequencing (NGS)
Veterinary Services
Viral Vectors
